

**Supplemental: Think Anomalous/Jason Charbonneau of  
Toronto, Canada.  
His Documentary on Travis Walton.**

Travis was 22 years old when the event happen. Said that the UFO looked like two pie pans face to face with a dome on top. It was about 15-20 feet wide and 8-10 feet tall. Sounds like it may have been a scout ship (*not confirmed*). Travis got about 6 feet close to the craft. That is a no no. Human should avoid the strong magnetic fields of a UFO. The UFO made machine noises and began to wobble. "Bright Blue Green Beam" stuck Travis. This may have been "Prana" energy? (*Not sure if Devachan or Avichi level?*) But it sounds like Prana energy due to the tree ring growth report at the site. Also, the Chernobyl vegetation growth reports from nuclear meltdown. Its sounds to me that they used this Bright Blue Green Prana energy to transfer Walton's consciousness into his etheric body.

**NS Questions:**

- 1.)Not sure if they took his physical body on board the UFO or not?
- 2.)Was his body left on the ground?
- 3.)Did the ETs put his body in stasis on the ground or on the ship?
- 4.)Was this a join Martian Venusian operation?
- 5.)Were the Brown eye Greys ET security or Martians?
- 6.)Were the human looking ET Venusian?

When Rogers stop the truck he saw a the golden outline of a UFO Flying away and decided to go back. The sheriff also saw a UFO a few years earlier so he was inclined to believe Walton. Micheal Rogers did see a Forrest Ranger taking radiation readings. This Unknown ranger tested the lumberjack's hard helmets and found them 4 times above normal.

**NS Questions:**

- 1.)Was the ranger a black hat agent?
- 2.)Why didn't he I.D. Himself.
- 3.)Why did he scam so quickly?

William Spaulding of the "Ground Saucer Watch" was the 1<sup>st</sup> UFO researcher to make contact with Walton's group. Jason Charbonneau said it took "5 days and 6 hours" for the ETs to return Walton to the side of a road. When Walton came to he saw a UFO leaving. This ship was 40 feet wide and 14 feet tall. The 3 Brown eyed ETs that Walton first encounter when he woke up were 5 feet tall with pale white skin. They were in orange jump suites. Walton had an object on his chest which fell to the floor and it emitted a Green light. Was this to stabilize his etheric body while he was out of his physical body.

**NS Questions:**

- 1.) Why didn't the 3 Brown eye ETs answer Travis's questions?
- 2.) Why didn't the human ET answer Travis's questions?
- 3.) Why was Travis shown the Star Room?

- 4.) Why did they have to wait two minutes before they entered the hanger bay?
- 5.) Did Travis get too close and the ETs had to give him medical treatment to correct the damage?

When in the chair of the "star room" he pushed some of the buttons which had little effect. The 3 Brown eyed ETs could breathe the same air as Travis but the Human ET guide needed a helmet? The human ET had a blue jumpsuit and a helmet on when Travis encountered him. The exam room had 2 Human males and 1 Female. All the Human ETs had blue jumpsuits and Golden-Hazel Eyes but no helmets on. Travis resisted on the exam table. They put a breathing mask on him and he blacked out.

James Harder of ARPO wrote a report. Travis said he wished he it never happen. He said it was a negative experience. Travis made money of the experience. Did his higher self want him to have this experience so as to spread the word. It appears his personality is in conflict with this?
